### Wednesday Morning Coffee

Kay Liebenow would like to invite any Indian Creek residents who are home during the day to a neighborhood get-together on **Wednesday, September 24, 10:00am**. Everyone is welcome – male, female, retired, or younger. Please let Kay know if you are

planning to come: 728-2427, [KayLiebenow@hotmail.com](mailto:KayLiebenow@hotmail.com). Kay lives at 33 Candle Ridge. The hope is that we can make this a monthly get-together.

### Welcome New Neighbor

Please welcome David Johnson, who has moved to the Smalley house at 35 Candle Ridge with his long time friend, Sheree McArdeil. They moved from Pontiac, Illinois because of their home flooding there last January. David is a Client Service Rep for Unisys Corp doing computer service around central Illinois. Sheree is a homemaker. David tells us, "Indian Creek is an ideal location and we enjoy the outdoors and wildlife in the area. Hobbies include gardening and movies. Look forward to meeting the new neighbors."

### New Water Chairman

We are delighted to announce that Bob Hancock has agreed to be the ICWHA Water Chair, effective August 15. If you see him, please thank Bob for volunteering for this valuable service to our community.

The information from the TriCountry letter you received in the mail is now on the IC website water page: <http://www.frontiernet.net/~indiancreek/icwater.htm>.

Note that you still call the **JULIE** number (800-892-0123) if you are planning any digging. JULIE will notify TriCounty. No one needs to call TriCounty, ever, unless they want to have the water lines mapped between the shut-off and their home, which would be a private service done at the homeowner's expense.

If you have any questions about this or any other water issues, please contact Bob Hancock or any other board member. Board members are:

Brian Krause – President  
Dave Schulthes – Treasurer  
Jim Russell – Grounds Chair

Barb Ulbrich – VP/Secretary  
Bob Hancock - Water Chair

## Corn in the Bean Fields

When we first moved to central Illinois back in 1964, Tim and I were captivated by something we'd never heard of, called **'bean walking.'** When our children became teenagers, bean walking was a way for them to earn some summer spending money. For those of you who weren't around farming before 1996, 'bean walking' meant walking through the rows of soy bean fields pulling and cutting out the weeds.

After genetically altered 'Roundup Ready' soy beans became commercially available in 1996, no-till farming became possible and soy bean fields were now growing without weeds. Farmers could use the herbicide Roundup to kill the weeds but not harm the soy beans. The use of Roundup did not increase yield, but did cut expenses by allowing no-till farming and eliminating the necessity to 'walk the beans'.

So Tim and I were puzzled this year to notice many bean fields with corn stocks sticking up here and there. A query to a farmer friend revealed that the planting of genetically altered 'Roundup Ready' corn has become more popular – so now the farmers are faced with the situation of corn unaffected by the herbicide sprayed on the soy bean fields. One has to question the wisdom of engineering two crops that are commonly rotated to be resistant to the same herbicide. Our farmer friend told us the corn is not a problem if there is not too much of it – but what does the future bode?

The Museum's newsletter states that the exhibit "features photos commissioned by early museum curator Milo Custer during his 1906 visit to the Kickapoo Reservation in Kansas. ... Artifacts uncovered during archaeological digs are also shown in the exhibit which explores the history of the Kickapoo Indians – their movements across the prairie, their lifeways, their interactions with early settlers, and their forced removal to reservations west of the Mississippi River."

## Please Drive Carefully

Another resident has asked that we drivers all SLOW DOWN!!! She reminds us, "Kids are getting on the bus, grown-ups are walking/running, people are going for bike rides etc. It is a beautiful neighborhood and people should be safe when out enjoying it....sometimes people are way too careless in their vehicles. "
